Rim version

Education

Residential

Commercial

Healthcare

Hospitality

# *Installation has never been easier - or quicker*

## **WITH FAST, INSTALLATION TIMES ARE REDUCED BY HALF**

Thanks to recent technical improvements, installing FAST panic exit devices is quicker than installing earlier models by as much as 50%. Installation time is faster because:

- additional locking points are installed on support plates with a quick-lock system and adjustments can be carried out on site;
- adjustments are easy to carry out via a flexible cable connecting the mechanism with the additional locking points;
- the adjustment screws on the main mechanism are easy to reach as they are ergonomically positioned to help the locksmith;
- simple instructions are given to cut the bar, cover and cable which do not require any measurements;
- the bar is installed in a few simple operations after fixing the mechanism;
- the cover is fixed quickly with no screws needed;
- instructions are simple to follow.

# Finishes

So much more than technology. The focus on design and colour combination make FAST panic exit devices highly versatile products, blending into any environment. The PVD finishes in particular give the product both style and strength.

### Antibacterial protection

The new antibacterial treatment for panic exit devices offers many advantages:

- it is safe for humans; it protects against the spread of microorganisms;
- it inhibits the growth of bacteria and dangerous fungi;
- it provides continuous protection.

All Cisa Fast Plus models, in every colour, will be supplied with antibacterial treatment.

### Certifications

The treatment has been successfully tested on two of the most common strains of bacteria: Escherichia Coli and Staphylococcus (and derivatives). CISA commissioned an external laboratory to conduct the tests in compliance with the European standard ISO 22196:2011.

PROTECTION

# European standards and CE certification

Since 2002, emergency exit systems have been regulated by two specific European standards: EN 1125 for panic exit devices and EN 179 for emergency exit devices. On 16 December 2008 the former standard EN 1125:1997:02 was updated to the NEW EUROPEAN STANDARD on panic exit devices EN 1125:2008. As a result, since 1 January 2010, only products which have been granted a mark according to the new standard may be marketed.

CISA passed all the tests and on 2 January 2009 it was awarded the new certificates for all the "Rim" versions. In 2002 it was the first company in Italy to introduce CE marking on its panic exit devices.

In 2013 legislation came into effect whereby all non-CE marked panic exit devices had to be replaced.

Main EN 1125:2008 standard prescriptions

- 1) A panic exit device must allow opening at any time by anyone (including children, the elderly or the disabled, etc.), by applying minimal pressure with the hands, body or anything else on any point of the horizontal bar.
- 2) A panic exit device must be able to be installed on public passage doors (e.g. in shops, offices, hospitals, schools etc.) and must therefore be suitable for extremely intense use.
- 3) A panic exit device, if installed on a fire door, must be able to guarantee that, after evacuation, the door will close again also in the event of extremely high temperatures.
- 4) A panic exit device must be guaranteed against corrosion.
- 5) In a panic exit device the bar projection must not exceed 150 mm.
- 6) Every panic exit device must carry: the manufacturer's name and trademark, identifying codes, applicable EU standard number (UNI EN 1125), month/year of end user installation by the manufacturer.
- 7) There may be two types of panic exit device: with a class A push-bar and with a class B touch-bar.

## 500,000 reasons to choose FAST

Today, in keeping with its policy of ongoing improvement and compliance to applicable standards, CISA has obtained further certification from ICIM, the certification body recognised throughout Europe.

This voluntary certification certifies the durability of FAST panic exit devices for 500,000 cycles on doors weighing 400 kg, compared to the provisions of the highest grade of the standard (Grade 7) which tests 200,000 cycles on doors weighing over 200 kg.

# FAST Touch

## TECHNICAL FEATURES

- Painted aluminium/aluminium alloy cover.
- Painted aluminium bar, adjustable in length down to 300 mm on all models.
- Chrome-plated aluminium alloy latchbolts and deadbolts.
- Deadlocking top/bottom and side latchbolts.

## STANDARD CONFIGURATION OPERATION

- From the inside: by pressing the bar.
- From the outside: with the key and/or handle.

## HAND

0 = non-handed.

## SUPPLIED AS STANDARD

- Special strikes.
- Fixing screws.
- Installation and maintenance instructions.
- ICIM and CE certificates of compliance.

## ON REQUEST

- Outside access devices.
- Extended bolts.
- Version with microswitch (spec. LA).
- Version with hold open device (spec. FG).
- Fire door version with steel latchbolts (spec. FR).

*Finishes: see page 6.*

\* Operation from the outside with the key only is only possible for single side lock panic exit devices.

## CERTIFICATIONS AND MARKINGS

Thanks to the materials used and the technical solutions adopted, the product complies with the strictest regulatory requirements. This has enabled CISA to obtain marks and certifications including:

- CE marking in accordance with 89/106/EEC DIRECTIVE issued by ICIM.
- Voluntary product certification issued by the independent certifying body ICIM according to UNI EN 1125.

# FAST Push

## TECHNICAL FEATURES

- Painted aluminium/aluminium alloy cover.
- Stainless steel or painted steel length-adjustable bar (to be ordered separately).
- Chrome-plated aluminium alloy latchbolts and deadbolts.
- Deadlocking top/bottom and side latchbolts.

## STANDARD CONFIGURATION OPERATION

- From the inside: by pressing the bar.
- From the outside: with the key and/or handle.

## HAND

0 = non-handed.

## SUPPLIED AS STANDARD

- Special strikes.
- Fixing screws.
- Installation and maintenance instructions.
- ICIM and CE certificates of compliance.

## ON REQUEST

- Outside access devices.
- Extended bolts.
- Version with microswitch (spec. LA).
- Version with hold open device (spec. FG).
- Fire door version with steel latchbolts (spec. FR).

*Finishes: see page 6.*

\* Operation from the outside with the key only is only possible for single side lock panic exit devices.

## CERTIFICATIONS AND MARKINGS

Thanks to the materials used and the technical solutions adopted, the product complies with the strictest regulatory requirements. This has enabled CISA to obtain marks and certifications including:

- CE marking in accordance with 89/106/EEC DIRECTIVE issued by ICIM.
- Voluntary product certification issued by the independent certifying body ICIM according to UNI EN 1125.

# FAST Push-pad

## TECHNICAL FEATURES

- Painted aluminium/aluminium alloy cover.
- Chrome-plated aluminium alloy latchbolts and deadbolts.
- Deadlocking top/bottom and side latchbolts.

## STANDARD CONFIGURATION OPERATION

- From the inside: by pushing the pad.
- From the outside: with the key and/or handle.

## HAND

0 = non-handed.

## SUPPLIED AS STANDARD

- Special strikes.
- Fixing screws.
- Installation and maintenance instructions.
- ICIM and CE certificates of compliance.

## ON REQUEST

- Outside access devices.
- Extended bolts.
- Version with hold open device (spec. FG).
- Fire door version with steel latchbolts (spec. FR).

*Finishes: see page 6.*

\* Operation from the outside with the key only is only possible for single side lock panic exit devices.

## CERTIFICATIONS AND MARKINGS

Thanks to the materials used and the technical solutions adopted, the product complies with the strictest regulatory requirements. This has enabled CISA to obtain marks and certifications including:

- CE marking in accordance with 89/106/EEC DIRECTIVE issued by ICIM.
- Voluntary product certification issued by the independent certifying body ICIM according to UNI EN 1125 for FAST Push and UNI EN 179 for FAST Push-pad.

# Outside access devices

## New lever design

- Longer lever handle available (+55 mm for item 1.07078.68) for easier grip
- RTD (Return to door) lever design prevents clothing from getting caught

## The ideal solution when installing in reduced spaces

- Version with lower lever (item 1.07078.36.0)
- 47mm protrusion from the door, ideal in reduced spaces

## Easier to open/close without catching fingers

- Lever is positioned below the cylinder, leaving more space to rotate and reducing the risk of hitting fingers against the cylinder
- Easier to insert and turn the key

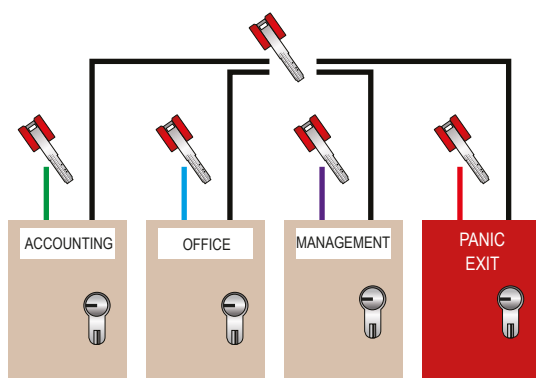

## Finishes

- The outside access devices are available with the following finishes: painted steel grey, white and grey.
- A satin finished PVD-treated stainless steel finish is also available.

## Same footprint on both versions

The new OAD is perfectly interchangeable with previous versions

## Enhanced MK potential

Master key systems are the most convenient, value-for-money solution to manage access in public or commercial settings, guaranteeing maximum security and protection for the building at all times.

One key unlocks several different doors and is managed accordingly. Only those with access rights are granted entry to certain areas.

**Devices can be integrated into an access management system**  
707836/38 range with a Euro profile cylinder, the OAD can be integrated into a master key system.

# Electric strikes

## TECHNICAL FEATURES

- Operating voltage 12, 24 V AC and 12, 24 V DC - CE.
- Galvanised steel case.
- Painted aluminium alloy cover.
- Chrome-plated aluminium alloy strike.

## OPERATION

- The electric strike allows for remotely controlled door opening.

## HAND

- Non-handed for left-hand and right-hand doors.

## SUPPLIED AS STANDARD

- Nylon spacers item 1.07089.02.0.
- Fixing screws.
- Installation instructions.

The electric strikes are available in the same finishes as the panic exit devices.

*See page 6.*

### Version without hold-open mechanism

When the button is held down, the strike receives power; the door can only be opened when the button is held down (the strike is released when it receives power).

This version includes models equipped with microswitches to control open/closed door status.

### Version with hold-open mechanism

When the button is held down, the strike receives power; it is released when it receives the first impulse, allowing the door to be opened. The electric strike blocks again, locking the door (the striker is released when it receives power).

### Version with powered coils

When the button is pressed, power to the strike is interrupted: the door can only be opened when the button is held down (the strike is released when it does not receive power).

# Adjustable strikes

## COMPATIBILITY

CISA adjustable strikes can be installed to match all the FAST series panic exit devices.

### STRIKE FOR ALUMINIUM DOORS ITEM 1.07072.31.0

Vertical and horizontal adjustment options, enabling to:

- Carry out installation in a few, simple operations
- Avoid having to use spacers
- Obtain flush compensation between - 8 mm and + 4 mm
- Ensure adjustment accuracy

### STRIKE FOR FACTORY DOORS/ GATES ITEM 1.07072.32.0

Wide adjustment range enabling:

- Installation on doors with leaf to frame clearance up to 25 mm
- Obtain flush compensation between - 4 mm and + 7 mm

### STRIKE FOR WOOD AND PVC DOORS ITEM 1.07072.33.0

Special L-shape and top fixing screw position enabling:

- cantilevered installation on profiles with 14 to 24 mm overlap

Installation diagram 1.07072.31.0

Installation diagram 1.07072.32.0

Installation diagram 1.07072.33.0

# Glass kits

## EASY INSTALLATION

CISA glass kits are designed to offer a complete range of solutions for all kinds of installations of FAST panic exit devices on glass doors.

## MODULARITY

- The necessary parts are available in kit form, so only the parts actually needed for the installation can be chosen, allowing for product customisation.
- There are glass kits to match the whole range of FAST series CISA panic exit devices.

## TECHNICAL FEATURES

- Steel mounting plates and components.

## HAND

0 = non-handed.

## SUPPLIED AS STANDARD

- Fixing screws.
- Installation instructions.

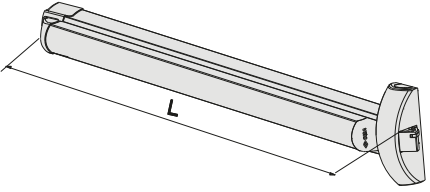

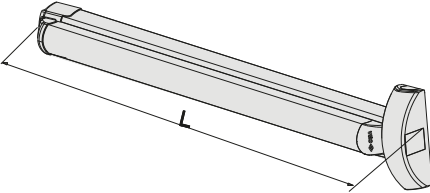

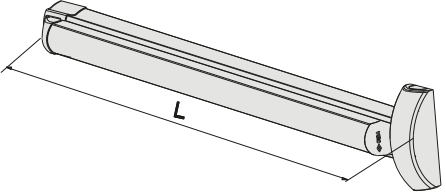

## FINISHES

- Standard: painted BLACK.
- PVD treatment: satin-finished stainless steel (fin. C2)
