

BENEFITS

SMART

Nuki unlocks your door automatically when you come home and locks it again when you leave. The key stays in the lock while your phone stays in your pocket.

SIMPLE

The Nuki Smart Lock is mounted on the inside of your existing door lock and ready to be used within three minutes without any further assistance. No screws, no drills.

SECURE

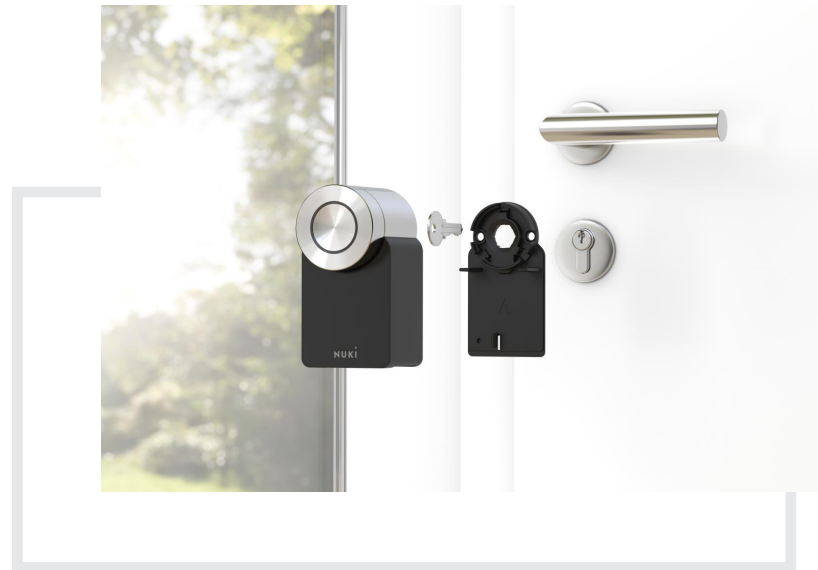

Stay in control of your Nuki Smart Lock by checking the status of your lock on your smartphone and by managing access permissions for your friends and loved-ones remotely.

THE EVOLUTION OF OPENING DOORS

FAST & EASY INSTALLATION

No modifications are required before fitting a Nuki. You fasten or stick the electronic door lock to your existing cylinder on the inside of the door. This means both variants can be removed without leaving a trace, making them ideal for renters. You can set up, operate and manage all your Nuki products with the Nuki app.

WHAT IS NUKI?

Nuki is known for retrofittable access solutions that simplify your everyday life.

Smart, simple, secure – for keyless access to your home. The Smart Lock 3.0 turns your door into a smart access system and your smartphone into an intelligent key.

Find out if Nuki fits your door.

FEATURES

Door Lock and Unlock

The Nuki app will allow you to lock your Nuki Smart Lock in future with a simple swipe on your smartphone or smartwatch.

Auto Unlock

With Auto Unlock turned on, Nuki recognizes your smartphone without you even touching it and opens the door automatically when you come home.

Lock 'n' Go

If you want Nuki to lock your door seconds after you left your home, simply activate the Lock 'n' Go feature from your smartphone app or from the button on the Smart Lock.

Auto Lock

The electronic door lock locks the door securely as soon as it closes behind you, so you'll never need to worry whether your door is locked again.

Schedule

Thanks to the integrated schedule feature, your Smart Lock can lock or unlock your door automatically at any time you choose.

Individual access permissions

Manage home access for your family, friends, guests, craftsmen or baby-sitter – on a permanent or recurring basis.

Door sensor

With the additionally available Nuki Door Sensor you can see in the Nuki app not only the status of the locking cylinder (locked or unlocked), but also the status of your door (open or closed).

Smart Home integrations

Looking to easily integrate your Nuki Smart Lock into your existing Smart Home? The Nuki Smart Lock is designed for standard compatibility with a wide range of Smart Home systems.

NUKI PRODUCT WORLD

Elegant design in two colours

... and combined with the aluminium finish of the rotary knob, you can give your front door a touch of simple elegance.

Say hello to Wi-Fi

The Nuki Smart Lock 3.0 Pro is equipped with a built-in Wi-Fi module. Control your door remotely online and assign secure access permissions on the go - completely without Nuki Bridge.

More power for your Smart Lock

The smart door lock now comes with the Nuki Power Pack included as standard. With the rechargeable battery pack you can now get up to 100% longer battery life.

Upgrades for your Smart Lock

Use our smart accessories like the Nuki Door Sensor, the Nuki Bridge, the Nuki Opener, the Nuki Keypad or the Nuki Fob and benefit from even more comfort in your everyday life.
